Thank you for your patronage.

**100% of Kimball Office Inc. Manufactured Products
Achieve level 2 or 3 Certification**

*Kimball Office Outpaces level 3 Offerings to the Industry
by More Than ThreeTimes*

If you're looking for Eco-Friendly Products, Kimball Office is your answer! 100% of all Kimball Office manufactured products are now ANSI/BIFMA level 2 or 3 Certified, including all casegoods, systems, tables, and seating. Level 3 is the highest certification under the current ANSI/BIFMA program.

The BIFMA level program establishes measurable performance criteria to address environmental aspects of product manufacturing throughout the supply chain, including the areas of materials, use of energy, human and ecosystem health, and social responsibility.

The level certification program allows facility managers, architects, and designers to evaluate products using a 'level' playing field, based upon the product and manufacturer's environmental and social impact.

Kimball® Office Inc Manufacturer to Offer Entire Wood Casegoods and Storage Series at level 3**What is ANSI/BIFMA's level product certification program?**

Based on the ANSI/BIFMA Furniture Sustainability Standard, level™ is a multi-attribute, third-party certification program for sustainable business furniture. The level program evaluates the environmental impact of a product through its entire supply chain, including the areas of material selection, manufacturing processes, energy used, human and ecosystem health, and social responsibility.

There are three levels of conformance, each requiring specific prerequisites and optional credits, similar to Leadership in Energy and Environmental Design (LEED®) certification. Credits are awarded for various sustainable attributes to achieve level 1, 2 or 3 with the most stringent certification being level 3.

Kimball Office uses Scientific Certification Systems (SCS) as their third party certifier. SCS awarded Kimball® Office the following product certifications:

level 3 Series

Casegoods and Storage level 3, (FSC wood option required on some products):

- Footprint® wood
- Footprint® laminate
- Priority™ wood
- Priority™ Laminate
- Fluent®

Kimball Office Corporate Social Responsibility

Kimball Office's manufacturing practices have been recognized for their continued efforts in reducing carbon emissions and material waste. Recent accomplishments include:

- 2010 "Pollution Prevention Champion" from the Idaho Department of Environmental Quality.
- 2010 "Governor's Award for Environmental Excellence in Pollution Prevention" from the Indiana Department of Environmental Management, the Lieutenant Governor's Office of Energy and Defense Development, Indiana Department of Administration, and the Indiana Department of Natural Resources

Additionally, for more than 40 years, Kimball Office has strived to honor the environment and communities through various philanthropic programs, including the following:

- *Trees for Tomorrow* – Since 1990, Kimball Office has given away over 400,000 seedlings for neighborhood enhancement, community disaster recovery efforts, and reforestation projects around the world.
- *ANew* – In February, Kimball Office partnered with the Asset Network for Education Worldwide (ANew) to extend the life cycle of its furnishings by promoting the donation of used products to underserved organizations. ANew is a nonprofit organization dedicated to organizing the repurposing of surplus furniture, fixtures, and equipment (FF&E)
- *Soles4Souls* – Since January, Kimball Office has partnered with nonprofit organization Soles4Souls to provide more than 1,000 pairs of shoes and \$4,000. Soles4Souls has provided nearly 12 million pairs of new or gently worn shoes to people in more than 125 countries.

Kimball Office Inc. Partners with ecoScorecard

[ecoScorecard](#) is a fast, efficient way for Architects and Designers, facility managers, or anyone interested in creating a green work environment to evaluate and select products that can contribute towards environmental certification projects.

With ecoScorecard, it's simple to narrow your product selections on the environmental aspects important to your specific project and see how our products can contribute. You can even create a project within ecoScorecard, and save your work to complete your evaluation and documentation at a later time.

[ecoScorecard](#) contains credit and other information for the following environmental rating systems:

- LEED for New Construction
- LEED for Commercial Interiors
- LEED for Existing Buildings
- CHPS
- LABS21
- Green Guide for Healthcare

When it's time to complete your rating system application, ecoScorecard quickly and easily provides the documentation needed to support the credits being claimed. With ecoScorecard, your documentation process can be shortened from hours to just minutes!

ecoScorecard Benefits Include:

- ecoScorecard lets Designers & Architects focus on design, by simplifying the gathering data to apply for green rating systems.
- Furniture specifiers can get product information for environmental rating systems 24 hours a day, 365 days a year.
- As green building rating systems change, ecoScorecard is immediately updated so the results are always fast and accurate.
- Along with Kimball Office product information, ecoScorecard also includes information for other manufacturers...from flooring to wallcoverings. By utilizing ecoScorecard, you can save evaluation time during the environmental consideration phase of your project for many space components.

ANEW Partnership

Kimball Office Inc. is proud to partner with ANEW to offer
a solution that ANEW calls:

"Doing what's right with what's left"®

ANEW is the answer for unwanted furniture, fixtures, and equipment (FF&E) left over from your remodeling project.

Community Support

Asset Network for Education Worldwide, Inc. (ANEW) is an easy effective way to organize and responsibly disposition surplus furniture, fixtures and equipment (FF&E). By directing your unwanted furnishings, fixtures, and equipment to others who can use them, you can promote healthy growth in your community and divert materials from our landfills.

Public charities, agencies, and nonprofits organizations all benefit by receiving repurposed furniture. Donations help lower capital expenses, allowing these groups to focus on extending their services.

When you work with ANEW, you are supporting the health of a community. Fire and police departments, clinics, and schools all have limited budgets. ANEW matches needs for furniture and furnishings with donors to enhance their efficiencies, expand their operations, and maximize their resources.

Environmental Responsibility

Today, tons of reusable surplus furnishings enter our landfills...it's an easy option with a high environmental price. ANEW is dedicated to repurposing your useable surplus furniture, fixtures, and equipment as an alternative to sending it to a landfill by matching your surplus furnishings to an organization in need. The lifecycle of products can be extended to avoid landfill usage. When items cannot be repurposed due to their condition and/or material content, ANEW coordinates those items for recycling or evaluation for energy-from-waste conversion.

Over 1,900 tons has been diverted from landfills since 2006 with the help of ANEW.

For every project, diversion rates are reported back to the customer. A Social Sustainability® Certificate is issued to support documentation toward USGBC LEED certification.

Convenient Disposal

Let ANEW take a look at your surplus inventory - all of it - ANEW takes useable and non-useable items as a single point resource, saving you time and money. ANEW looks at the big picture - for those clients, architects, dealers, or facility managers who are committed to finding alternatives to landfill, ANEW listens and provides a cost analysis that highlights the best possible outcome.

Tax Benefits

Your donation of surplus furniture, fixtures and equipment is tax deductible to the full extent of the law. You receive a tax receipt when your surplus is successfully matched to charities and public agencies. ANEW is dedicated to repurposing surplus and gifting it to those who need it.
